# SUBJECT INDEX

Bold numbers **259**, **260** and **261** refer to volumes i.e. parts I, II and III respectively

4-21G calculations
Empirical corrections of SCF geometries with special examples from 4-21G calculations, **259**, 289

Additional reactions
Hybrid orbitals evolution and reaction path in addition reactions, **260**, 249
Aluminium dimer
A density functional study of the aluminium dimer, **261**, 277
Annulenes
Calculated "London"-electron magnetic properties of some "perturbed" annules: their dictations and dianions, **260**, 133
Aromatic polyesters
Conformations and rotational barriers of aromatic polyesters. Part II. Rotational barriers in para-hydroxybenzoic acid, polyethylene terephthalate, and small aromatic moieties, **259**, 331
Atomic radii
A universal density criterion for correlating the radii and other properties of atoms and ions, **259**, 121

BeHF system
An accurate fit of the potential energy surface of the BeHF system, **260**, 179
Benzene
The meta photocycloaddition of benzene to ethylene: ab initio calculation of a symmetric pathway, **260**, 333
Benzocyclobutadienes
Strong Mills–Nixon effect in benzocyclobutadienes, **260**, 241
Biphenylene
Ab initio heats of formation of medium-sized hydrocarbons. Part 14. Pyracylene and biphenylene, **259**, 173
"Bond valence sums"
On the concept of "bond valence sums" and its applicability in solid state chemistry and physics, **260**, 81
Borane cluster chemistry
Stability patterns in borane cluster chemistry rationalised by extended Hückel molecular orbital studies, **261**, 161
$Br_2$
Solid state effects in the molecular crystals of $Cl_2$, $Br_2$ and $I_2$, **261**, 355

$C_2H_4X^+$ (X = F, Cl or Br) cations
Hydride affinities of halogen substituted carbocations: the $C_2H_4X^+$ (X = F, Cl or Br) cations, **259**, 257
$C_4H_7^+$
The definition of a chemical bond, of molecular structure and of its change as exemplified by the structure diagram for $C_4H_7^+$, **261**, 1
Carbon helides
Helides of carbon and silicon: an ab initio study of their geometric and electronic structures, **261**, 385
$[CH_3–H–CH_3]^+$ system
Analysis of the hydride transfer in the $[CH_3–H–CH_2]^+$ system in terms of valence bond structures, **260**, 259
Charge capacity
Electronegativity and the concept of charge capacity, **259**, 99
Chemical bond
About the nature of the chemical bond, **261**, 113
Chemical bonding and vibrations, **261**, 121

The chemical bond and molecular structure, **259**, 29
Chemisorption studies
Valence in chemisorption studies, **260**, 339
$Cl_2$
Solid state effects in the molecular crystals of $Cl_2$, $Br_2$ and $I_2$, **261**, 355
CO
A valence bond study of the dipole moment of CO, **261**, 63
Conjugated ketones
Molecular mechanics calculations (MM3) on conjugated ketones, **260**, 161
Covalent solids
Cohesive energies of simple ionic and covalent solids, **260**, 11
Cristalobite
Pseudopotential periodic Hartree–Fock study of the cristobalite to stishovite phase transition, **260**, 1
$[Cr(gly)_2(OH)]_2$
Pair states and orbital exchange coupling parameters of the dimeric diol complexes $[Cr(ox)_2(OH)]_2^{4-}$ and $[Cr(gly)_2(OH)]_2$, **261**, 203
$[Cr(ox)_2(OH)]_2^{4-}$
Pair states and orbital exchange coupling parameters of the dimeric diol complexes $[Cr(ox)_2(OH)]_2^{4-}$ and $[Cr(gly)_2(OH)]_2$, **261**, 203
Currents
Magnetic interactions and 4-currents, **261**, 69

Degeneracies
Dynamically produced degeneracies, **261**, 331
Diatomic bond
The diatomic bond in a monochromatic laser field: a time dependent study, **261**, 265
Dipleiadiene
$\pi$-electron "ring-currents" in dipleiadiene, **260**, 123
Dipolar molecules
Increased-valence structures and spin-coupled valence bond descriptions of 1,3-dipolar molecules, **259**, 155
Direct reaction field approach
Quantum chemistry in the condensed phase: an extended direct reaction field approach, **260**, 195

Electron correlation effects
On the diagrammatic analysis of electron correlation effects in atoms and molecules, **261**, 287
Electron density
Electron density in the ground states of atoms and molecules, **260**, 273
Electron scattering
Correlation forces in electron scattering from atoms and molecules: a density functional approach, **260**, 99
Electronegativity
Electronegativity and the concept of charge capacity, **259**, 99
Electronegativity: why has it been so difficult to define?, **261**, 313
Electronic continuum
Variational methods and the electronic continuum, **260**, 143
Ethylene
The meta photocycloaddition of benzene to ethylene: ab initio calculation of a symmetric pathway, **260**, 333
Exponential-type orbitals
Recent progress on representations for Coulomb integrals of exponential-type orbitals, **260**, 207
Extended-Hückel perturbation
The extended-Hückel perturbation theory and the concept of orbital balance, **261**, 91

Fragment SCF theory
Molecular wavefunctions from chemical bonds: the fragment self-consistent field theory, **261**, 55
Fukui function
Quantum-chemical study of the Fukui function as a reactivity index. Part 3. Nucleophilic addition to $\alpha,\beta$-unsaturated compounds, **259**, 317

Gel'fand structures
Gel'fand structures: primitive patterns of understanding, **259**, 65

$H_2$
The electron affinity of $H_2$: a valence bond study, **261**, 403
[1*H*-imidazol-2-yl-]methyl ester
Theoretical study of carbamic acid [1*H*-imidazol-2-yl-]methyl ester, **259**, 265
Heterocyclic conjugated polymers
Ab initio studies on heterocyclic conjugated polymers: structure and vibrational spectra of thiophene, oligothiophenes and polythiophene, **259**, 181
$HF\cdots Cl_2$ binary complex
Ab initio MO study of the potential energy surface of the $HF\cdots Cl_2$ binary complex, **259**, 211
Hückel-Mobius rule
Generalized Hückel-Mobius rule, **259**, 307
Hypervalent phosphorus compounds
Theoretical study of bonding in $SePH_3$, $OPX_3$ and $SPX_3$: an ab initio investigation (X = H, F, Cl, $-C\equiv CH$, $-CH_3$, $-NH_2$, $-C\equiv N$), **259**, 345

$I_2$
Solid state effects in the molecular crystals of $Cl_2$, $Br_2$ and $I_2$, **261**, 355
Imines
Ab initio study of stability and structure related to geometric isomerism of imines and O-protonated carbonyl compounds. Part I. Simple acyclic compounds, **259**, 229
Ionic radii
A universal density criterion for correlating the radii and other properties of atoms and ions, **259**, 121
Ionic solids
Cohesive energies of simple ionic and covalent solids, **260**, 11
Isoelectronic reactions
A comparative study of isoelectronic and isogyric reactions. Part 2. Molecular orbital calculations of diatomic sulfides, oxides and halides, **260**, 395
Isogyric reactions
A comparative study of sioelectronic and isogyric reactions. Part 2. Molecular orbital calculations of diatomic sulfides, oxides and halides, **260**, 395

Jahn–Teller systems
Analysis of avoided crossings in energy correlation diagrams of Hahn–Teller systems, **261**, 153

Kinetic energy densities
On kinetic energy densities, **261**, 345

Lithium
The spin-coupled description of lithium clusters. Part I. Optimal geometrical arrangements and body-centred-cubic fragments, **259**, 383

Metal–organic complexes
Oxidation state and the chemical bond in metal–organic complexes, **261**, 21
Methoxydimethylphosphine
Ab initio calculation of the structural parameters, conformational stability, vibrational frequencies and Raman and infrared intensities of methoxydimethylphosphine, **261**, 133
Methyl fluoride
The general harmonic force field of methyl fluoride, **260**, 323
Methyl torsional potentials
An ab initio model for methyl torsional potentials incorporating skeletal flexing, **261**, 367
Methylated 1,3-butadienes
Ab initio studies of methylated 1,3-butadienes, **260**, 347
$(MgH)^+$ quasimolecule
Bonding in the $(MgH)^+$ quasimolecule, **260**, 63
Mills–Nixon effect

Strong Mills–Nixon effect in benzocyclobutadienes, **260**, 241
Molecular structure
On the shape and structure of molecules, **259**, 83
The chemical bond and molecular structure, **259**, 29
Momentum anisotropy
Chemical bonds and momentum anisotropy in phase space, **259**, 141
Monochromatic laser field
The diatomic bond in a monochromatic laser field: a time dependent study, **261**, 265

$NH_3$
Eccentric orbitals for lone pairs and hybridization theory: the case of $NH_3$, **259**, 59
Nonadditive effects
Ab initio calculations of nonadditive effects, **261**, 37

O-protonated carbonyl compound
Ab initio study of stability and structure related to geometric isomerism of imines and O-protonated carbonyl compounds. Part I. Simple acyclic compounds, **259**, 229
Olefins
Ab initio study of C–H bond breaking in olefins. Part I. General valence bond and multi-configurational self-consistent field computations on $C_2H_4 \rightarrow H_2C{=}CH + H$, **259**, 273
Oligomers
Insights into the molecular structure and chemical bonding of regular oligomers and polymers from their XPS valence spectra, **261**, 187
Outer-space electron transfer
The multiconfigurational theory of adiabatic outer-sphere electron transfer reactions proceeding in polar solvents, **260**, 223

Phase space
Chemical bonds and momentum anisotropy in phase space, **259**, 141
Photoionization process
Correlation in the photoionization process: the relaxed Hartree–Fock method, **261**, 79
Polymers
Insights into the molecular structure and chemical bonding of regular oligomers and polymers from their XPS valence spectra, **261**, 187
Potassium-like ions
Fine structure splittings of potassium-like and rubidium-like ions by the multiconfiguration Dirac–Fock method, **261**, 175
Propellanes
The molecular structure of pentastanna[1.1.1]propellane and bicyclo[1.1.1]pentastannane from the quasi-relativistic SIC-MS-Xα theory, **260**, 419
Pyracylene
Ab initio heats of formation of medium-sized hydrocarbons. Part 14. Pyracylene and biphenylene, **259**, 173

Relaxed Hartree–Fock method
Correlation in the photoionization process: the relaxed Hartree–Fock method, **261**, 79
Rubidium-like ions
Fine structure splittings of potassium-like and rubidium-like ions by the multiconfiguration Dirac–Fock method, **261**, 175

SCF geometries
Empirical corrections of SCF geometries with special examples from 4-21G calculations, **259**, 289
SiH
Infrared and ab initio studies of molecules containing SiH bonds. Part I. A correlation between $v^{is}$(SiH) and $r_e$(SiH), **260**, 27
Silicon
A theoretical study of chemical bonds in silicon species, **260**, 47

Determination of bond energy terms in silicon-containing compounds, **259**, 369
Silicon helides
Helides of carbon and silicon: an ab initio study of their geometric and electronic structures, **261**, 385
Singlet states
Singlet and triplet states of an electron pair in a molecule — a simple model, **260**, 299
Skeletal flexing
An ab initio model for methyl torsional potentials incorporating skeletal flexing, **261**, 367
"Slide-rule" basis sets
"Slide-rule" basis sets: application to the $^3S$ state of helium-like species, **260**, 313
Solid state phenomena
On the concept of "bond valance sums" and its applicability in solid state chemistry and physics, **260**, 81
Stishovite
Pseudopotential periodic Hartree–Fock study of the cristobalite to stishovite phase transition, **260**, 1

Tetramethylammonium
Tetramethylammonium as proton donor in hydrogen bonding: an ab initio and infrared study, **259**, 199
Tetramethylene biradicals
Reactivity of tetramethylene biradicals. Through-bond and through-space interactions: two singlet electronic states of a biradical, **261**, 115
Triborylborane
Boron versus carbon: conjugation, hyperconjugation and rotational barriers in the neoclassical boron hydride, triborylborane [$B(BH_2)_3$] and its dianion, **259**, 411
Triplet states
Singlet and triplet states of an electron pair in a molecule — a simple model, **260**, 299

Valence
Some key historical highlights in the evolution of the modern concept of valence, **259**, 1
Valence bond reference bonding
Propagator descriptions of ionisation and excitation phenomena using valence bond reference functions, **261**, 255
Van der Waals bonding
Understanding van der Waals bonding, **261**, 237
